

ELECTRONICS ASSEMBLER AND PRODUCTION OPERATOR

- Varied manufacturing skills include assembly of electronic components for manufacturing controls, sub-assemblies, hardware and software testing, and final quality inspection.
- Worked independently and assembled components from work orders and Bill of Materials (BOMs).
- Installed and inspected varied software applications within Microsoft Windows operating systems. Trainer for new employees regarding software installations.
- Soldering skills include the ability to work at the Printed Circuit Board (PCB) levels with lead and lead-free solder.
- Recognized for getting the job done right, every time. Supervisor frequently selects me to produce high-priority shipments, including 100% of the time for international orders.

EMPLOYMENT

Senior Assembler
NorthernLight Corporation 03/96–12/98, 03/00–12/11, 11/14–present
Manufacturer of Industrial Controllers

Produce sub-assemblies and final assembly of industrial controllers and equipment. Work from a Bill of Materials. Solder wiring and components. Modify and assemble cable harnesses. Calibrate test screen of each monitor. Complete 24-hour system burn-in testing and all final quality tests. Consistently meet production quotas and quality goals. Recognized by supervisor as a top 10% employee. Have not missed a day of work in three years.
